

**ZANKAR HOTSPRING™
TANKLESS WATER
HEATERS**

**Operates on
maximum efficiency.
Runs on minimal
energy.**

An energy efficient addition to your home

Driven by Pure Performance

A gift from the Himalayas, the Zānskar River is a source of life, and a symbol of purity and never ebbing energy. That's the stuff we're made of – **Pure Performance.**

At a time of global change, we believe that water, air and energy are integral to life and that these can and should be made accessible to everyone, in its purest form.

We bring you a range of products and solutions for the home which are designed in India placing highest importance on performance and customer experience.

And like the Zānskar valley, with conservation in mind, we acknowledge the beauty and fragility of the ecosystems we live in and promise to enhance ones quality of life with thoughtful products and services.

Our mission is to bring
you Pure Performance in

PRODUCT DESIGN
AND QUALITY

What is a tankless water heater?

Tankless water heaters as the name suggests do not have a tank hence no storage. They heat the water on demand when you turn on the tap.

Lack of water storage avoids expensive heat losses resulting in savings in energy and maximum convenience for users.

Provides unlimited supply of hot water

Why tankless water heaters are a smart choice for your home?

Saves Power

Saves Time

Saves Space

Why the Zanskar HotSpring™ tankless water heater?

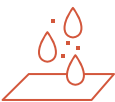

Nickel-Chromium Heating Elements for efficient heating

Auto memory function

High resistance to hard water

European Certifications

International Electrotechnical Commission

For Bathroom

For small and medium showers

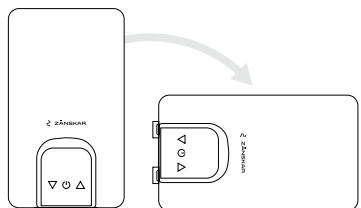

The new generation of fully electronic Zanskar HotSpring™ Tankless Water Heater for Bathroom has a compact, elegant design and is made up of High strength ABS cover casing & stainless steel heating elements. The appliance is extremely comfortable and efficient and tailored to individual demands and provides a superior experience for performance showering. It is an easy-to-operate, easy-to-install and easy-to-service appliance.

The appliance shows temperature settings, on the LED digital display and the direct temperature settings can be done easily with the touch screen facility. It comes with an automatic thermostat & automatic memory function which avoids repeated operation & also error code is displayed on the display screen.

Appliances have patented heating module systems with electricity leakage protection, anti-scalding, overpressure, and overheat protection.

MODEL: HSTB9
OUTPUT 6-9 KW

**2 way
installation**

For Kitchen

2.5 x
Smaller than
other kitchen
water heaters

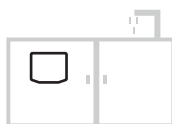

The new generation of fully electronic Zanskar Hotspring Tankless Water Heater for Kitchen appliance is compact in size and is perfect for use in the kitchen and installed under the sink in any direction i.e 2-way installation. The appliance is made up of high strength ABS splash-proof casing and a stainless steel heating element. It provides an unlimited supply of hot water and is installed at the point of use.

Appliance shows temperature settings on your LED digital display and the direct temperature setting can be done easily with a touch screen facility. It comes with an automatic memory function that avoids repeated operation in case of power failure.

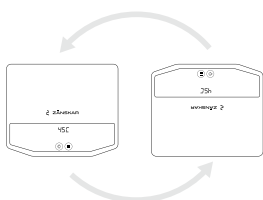

The appliance has a patented heating module system with electricity leakage protection, anti-scalding, overpressure and overheat protection.
